» Introduction

- ◆ AADRA Internationals, are a lofty association occupied with Manufacturing, Exporting, Supplying and bringing in of an exhaustive variety of Wax, Oils, Butters to various industries like Cosmetics, Pharmaceuticals and etc
- ◆ We are into attributable to the extraordinary quality and market driving costs of the items offered by us. We have possessed the capacity to meet the requests of different eminent customers. To guarantee that the offered items are impeccable, our items are stringently checked by the quality controllers previously the last dispatch. Our whole range is prepared with the quality models utilizing premium review, propelled devices and modern innovation. Inferable from the nature of the items, the range is broadly requested by the customers for its characteristics. For example, low thickness, insolubility in water, high dissolving point, exact synthesis, and fantastic hardness.
- ◆ We are profoundly propelled foundation that helps in the problem-free working of different divisions. We are reliably meeting the authoritative objectives, by the endeavors and diligent work of our colleagues. Giving all around tweaked products arrangement, we are a notable maker, provider, exporter and merchant of Beeswax, Oils, and Butter etc. These items are prepared in a profoundly propelled approach to ensure they hold all their normal quality.

Reason behind our Company's success

- ◆ Our widely distributed and well established network has given us an adequate reason to secure our position among leading manufacturer and supplier of Cosmetics, Pharmaceuticals, Wax Products and other allied products. With the help of our robust infrastructure and adroit professionals, we are able to make the delivery of our consignment within the committed time.
- Quality centric approach
 - Adept professionals
 - State-of-the-art infrastructure
 - Ethical business policies
 - Huge production capacity
 - Optimum quality products

Our Goal

- ◆ To be one of the respected business houses in the country, commanding credibility & enjoying customer satisfaction in both national and international markets.
- ◆ To ensure our products and services are cost competitive and that resources are continually dedicated to productivity improvements.

Our Export World Wide

Our Quality Certifications

» Beeswax

INCI Name: Cera alba

- ♦ Beeswax is a characteristic wax delivered by bumblebees of the class Apis. This is framed into scales by eight wax-delivering organs in the stomach fragments of working drones, which dispose of it in or at the hive Beeswax is edible, having similar negligible toxicity to plant waxes, and is approved for food use in most countries.

Applications:

Pharmaceutical, Cosmetic & Coating :

Tablet, Ointments, Creams, Lotions, Lipsticks, Skin Care, Lipbalm, Confectionery, Shoe Polishes & Candle

Specification of Beeswax

Name	Description	Odour	Melting range	Relative Density	Acid Value	Ester Value	Ratio number	Saponification
Beeswax IP	White & Yellow	Faint & Characteristics	61° to 65° C	-	5 to 15	75-95	5 - 19	87-104
Beeswax BP	White & Yellow	Faint & Characteristics	61° to 66° C	About 0.960	17 to 24	70-80	3 - 5	87-104
Beeswax USP	White & Yellow	Characteristics	62° to 65° C	-	17 to 24	72-79	-	Complies
Beeswax EP	White & Yellow	Faint & Characteristics	61° to 66° C	About 0.960	17 to 24	70-80	-	87-104

» Carnuaba Wax

INCI Name: Copernicia Cerifera

- ♦ It is also called the Brazilian wax. Carnauba wax is found from the leaves of carnauba palm. The pure wax is avail to us after a certain procedure, which involves drying the leaves, and crushes them in a way to get the wax. . It works as a natural emulsifier and softener for the skin. It has become more popular recently as it is completely natural and it gives a better result than the chemically based cosmetic products.

Applications:

Pharmaceutical, Cosmetic & Coating :

Tablet, Lipsticks, Skin Care, Lipbalm, Greases, Adhesives, Chewing Gum, Furniture Polishies, Leather Polishes, Automobile, Floor Polishes

Specification of Carnuaba Wax

Name	Ester Value	Melting Range	Acid Value	saponification	Density	Residue	Heavy Metals	Total ash
Carnauba wax BP	72-79	80° to 88° C	2 to 7	78-95	About 0.97	-	-	Max 0.25%
Carnauba wax IP	72-79	80° to 88° C	NMT 12.0	78-95	-	-	Complies	Max 0.25%
Carnauba wax USP	-	80° to 88° C	2 to 7	78-95	-	NMT 0.25%	20 ppm	-
Carnauba wax EP	72-79	80° to 88° C	2 to 7	78-95	About 0.97	-	-	Max 0.25%

»» Candelilla Wax

INCI Name: Euphorbia cerifera

- ◆ Candelilla wax is found in the Candelilla shrubs, which is in South America. It can be used a substitute to beeswax and it is also known as vegan wax. Apart from this, it is also popular in using skin care products such as body butter and lip balms, etc.

Applications:

Pharmaceutical, Cosmetic & Polishes :

Precision, Electroplating, Investment, Lotions, Lipsticks, Skin Care, Lipbalm, Confectionery, Furniture, Leather, Automobile, Floor, Greases, Adhesives, Chewing Gum, Coatings.

Specification of Candelilla Wax

Name	Specific Gravity	Heavy Metals	Melting Point	Acid Value	Saponification Value
Candelilla wax USP	0.983	NMT 20µg/g	68.5° to 72.5° C	12-22	78-95

»» Paraffin Wax

INCI Name: Paraffin

- ◆ Paraffin wax is a soft colorless solid, derived from petroleum, coal or shale oil, that consists of a mixture of hydrocarbon molecules containing between twenty and forty carbon atoms. The Paraffin wax is odor free and can be used for multiple purposes.

Applications:

Pharmaceutical, Cosmetic & Coating :

Tablet, Lipsticks, Skin Care, Lipbalm, Greases, Adhesives, Chewing Gum, Furniture Polishies, Leather Polishies, Automobile, Floor Polishies Ointment, Candle, Crayons.

Specification of Paraffin Wax

Name	Description	Melting Range	Acidity	Alkalinity	Residue	Oil Content	Penetration @ 25°c(1/10)
Paraffin Wax BP	Slab & Pastilles	50° to 61° C	NMT 0.5ml of 0.01M	-	Max 150ppm	<0.5%	9-20 ASTM D1321
Paraffin Wax IP	Slab & Pastilles	50° to 65° C	NMT 0.1ml of 0.1M	NMT 0.1ml of 0.1M	-	<0.5%	9-20 ASTM D1321
Paraffin Wax USP	Slab & Pastilles	47° to 65° C	NMT 0.1ml of 0.01M	NMT 0.5ml of 0.01M	-	<0.5%	9-20 ASTM D1321
Paraffin Wax EP	Slab & Pastilles	-	NMT 0.5ml of 0.01M	NMT 0.5ml of 0.01M	Max 150ppm	<0.5%	9-20 ASTM D1321

»» Soy Wax

INCI Name: Glycine Soja (Soybean) Wax

- ◆ The oil of soybeans used for making soy wax. This wax is environmentally friendly, recyclable & sustainable. It can be used to make candles and in skin care products. Soy wax is completely natural. The candles made from soy wax are burns longer than other candles.

Applications:

Pharmaceutical industries and cosmetic industries:
Tablet, Ointments, Creams, Lotions, Lipsticks,
Skin Care, Lipbalm, Confectionery, Leather, Textile,
Cordage, Shoe Polishes & Candle, Furniture, Leather,
Automobile, Floor, Precision, Electroplating, Investment,

»» Mango Butter

INCI Name: Mangifera Indica

- ♦ Mango Butter is a natural, renewable emollient derived from the fruit of the mangifera indica tree that is rich in C18 fatty acids and triglycerides. it contains a small amount of tocopherol to prevent rancidity, adds stability in emulsions and provides skin softening, has a less drag and longer shelf life than shea butter and appears as a soft solid that melts at room temperature. it is suitable for use in skin care, massage creams, make-up, lip care, sun care. hair conditioners. shampoos and foot care products.

Applications:

After Sun Skin Care, Bar Soaps, Facial Skin Care, Foot Care, Hair Conditioners, Hand & Body Care

Specification of Mango Butter

Name	Description	Fatty Acid	Melting Point	LOD at 105°C	R.I at 20°C	Sap. Value	Peroxide Value
Mango Butter	Yellow Colored Paste with Characteristic odor & taste.	NMT 10%	NLT 32°C	NMT 5%	1.456-1.458	NLT 180	NMT 20.0

»» Kokum Butter

INCI Name: Garcinia Indica Seed Butter

- ♦ Kokum is a fruit of Garcinia Indica tree. The kokum kernels contain a high amount of fatty acid and when extracted it becomes kokum butter. It has a mild fragrance and looks just like Shea butter. Kokum butter is known due to its high oxidative stability.

Applications:

After Sun Skin Care, Bar Soaps,
Facial Skin Care, Foot Care,
Hair Conditioners, Hand & Body Care,
Lip Care, Styling Aids.

Specification of Beeswax

Name	Impurities	Moisture	Fatty Acid	Peroxide Value	Iodine Value
Kokum Butter	-	0.09 g	3.35 g	24.18 mEq/kg	34.26

»» Shorea (Sal) Butter

INCI Name: Shorea Robusta Seed Oil

- ♦ It also is known as the Shorea butter as it derives from the Shorea robusta tree. Sal butter has similar properties of Mango butter. It is solid at room temperature, but it is also not completely soft. Due to its thickness, it is considered as the first preference in a number of the cosmetic formulation. It makes the skin look younger as it allows the skin to absorb required nutrition properly. Dry skin and dullness of skin can be treated with the regular use of Sal butter.

Applications:

Anti-Aging,
Body Care,
Hair Conditioning,
Hand Cleansing,
Skin Care.

Specification of Carnuaba Wax

Name	Fatty Acid	Peroxide Value	Iodine Value	Sleep Melting Point	Fatty Acid Composition
Sal Butter	0.12%	0.2 meq/kg	38.5	31.5° C	C16:0-11.2

» Honey

INCI Name: Honey

- ◆ Honey, the liquid gold, is a nutritional treasure having rich nutritional and medicinal value. Honey is a popular kitchen staple that has numerous antibacterial and antifungal properties. The usage of honey dates back to 2500 years across all cultures. When consumed in moderation, honey is a wonder liquid and helps relieve a lot of health issues.
- ◆ Aadra's organic honey is widely used as a sweetener and a substitute of sugar, has great medicinal value, has a better shelf life, has great advantages in terms of weight loss, gives better immunity, is used for various cosmetic purposes, Pharma and much more.
- ◆ Our honey is available in different variants to suit your daily requirements.

» Essential oil

Essential oil

♦ As a leading supplier of quality Essential Oils, we offer the largest selection of Certified Organic, 100% Pure and Certified Fair Trade Essential Oils and Aromatherapy Products at Wholesale Prices. Essential Oils are the natural essences of plants acquired by steam distillation or cold-expression from a single botanical source. These oils are widely used in aromatherapy as well as in other commercial enterprises such as cosmetics, pharmaceuticals, soaps, candles, and domestic cleaning products. Essential Oils are the immune systems of the plants being distilled, which enable the plant to defend itself from infection by other organisms. The fluids extracted from the plant are integral for its survival, but they often offer exotic fragrance compounds prized in Aromatherapy and Perfumery. At New Directions Aromatics, we offer a wide selection of pure, unadulterated Essential Oils obtained from the blossoms, leaves, bark, and roots of flowers, herbs, fruits and spices.
